-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 103***

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Basr-Gadda. Note that Bar-Gadda teaches the claimed reactant gases and since the claim language does not specify when the chlorine is admitted, i.e., with the  $\text{CHF}_3$  or after, nor when the supply is completed, it is obvious that the artisan would have found the claimed steps obvious via any etching process using the claimed gas combinations such as Bar-Gadda. With respect to the apparatus claims 9-15, since the plasma gases are taught and the gases can be controlled by the operator in a programmed manner, as is conventional, it is obvious that the apparatus claimed can obviously be used by the artisan in the claimed manner. The called for parameters such as pressures, power levels and flow rates as the dependent claims are considered obvious and routine design choices for the artisan barring further disclosure of when the admittance of  $\text{Cl}_2$  occurs relative to the other gases.

Art Unit: 3742

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ye et al, Hsia et al, Moise et al and Niino et al are cited for disclosing plasma-processing systems similar to that instantly disclosed.
